SUMMARY

Backend engineer who builds the engines that power great user experiences, and the proof that the work was actually delivered. I design, build, and deploy scalable RESTful APIs and full-stack applications with Django, DRF, Node.js, and Express.js. I'm at my best when turning a complex technical challenge into a simple, elegant solution, and I care as much about evidence and auditability as I do about shipping fast.

SELECTED WORK

ACI: Delivery Verification | Independent Product | 2026

- AI review bots are good at bugs and style. They don't prove a change satisfied the requirement or leave evidence you can still trust months later.
- Ingests requirements from Jira, Linear, GitHub, or manual entry and decomposes them into independently verifiable criteria.
- Tracks PRs, commits, and changed files, then builds an evidence pack from code, CI, and test artifacts tied to commit SHAs.
- Runs deterministic rules plus an LLM evaluator behind a provider-neutral interface, with a contract-validation layer before any conclusion is accepted.
- Produces a delivery decision (verified, partial, failed, or stale) with full decision history and evidence lineage.

Stack: *Django · GitHub webhooks · Jira · LLM evaluator · Vite*

Branchi Arts: E-commerce | Client Project | 2025

- Storefront platform so independent artists can launch and run their own shops.
- Artist-facing catalog, cart, and checkout flow with secure authentication and CRUD operations.
- Django + DRF API backed by Supabase, with Redis for hot paths.
- Delivered a polished, user-friendly interface that improved the client's online visibility.
- Frontend shipped on Vercel.

Stack: *React · Python · Django · DRF · Supabase · Redis · Vercel*

EventPro: Event Management System

- Scalable backend API for event creation, registration, and analytics.
- Built with Node.js, Express.js, and PostgreSQL, with secure authentication and CRUD operations.
- Optimized registration flow, achieving 40% faster response time and boosting engagement.
- Delivered seamless integration with a React frontend for enhanced retention.

Stack: *Node.js · Express.js · PostgreSQL · React*

Afrinet: Wi-Fi Hotspot Billing & Session Management

- Vendor-agnostic backend scalable for ISP-level commercial deployment.
- Integrated M-PESA Daraja API for automated payment verification and user session creation.
- Implemented polling and callback logic, ensuring reliability even on network disruptions.

Stack: *Node.js · M-PESA Daraja API*

Student Attendance System

- RESTful APIs for real-time attendance synchronization.
- Built dashboards for instant updates and class-level filtering.
- Improved record accuracy and reduced manual errors by 30%.

Stack: *Django · REST*

ADDITIONAL PROJECTS

- **POS & Inventory System** (J2EE, JSP, MySQL): Improved retail efficiency by 25% via analytics-driven tracking.
- **Jijenge Shopify App** (Flutter + Supabase): Multi-vendor support and real-time order tracking.
- **Electra Blockchain Voting App** (Rust + Anchor): Decentralized voting mechanisms ensuring transparency.
- **Automotive Listings Platform** (React + Node.js + MySQL): Enhanced authentication, boosting engagement by 30%.

EXPERIENCE

Software Developer, Independent Projects (Remote & Freelance) | 2023 to Present

- Deliver full-stack and backend solutions for multiple platforms.
- Collaborate with clients to translate business goals into scalable solutions.
- Manage version control and CI/CD pipelines for continuous delivery.
- Notable projects: ACI, Branchi Arts, EventPro, Afrinet, CloudHaven, Student Attendance System.

Tech Sales Executive, TechBiz Limited, Mombasa | Mar 2024 to Apr 2024

- Sourced leads and converted them to clients for the 47payday HR System.
- Strengthened customer relationships through technical demonstrations.
- Bridged business needs with technical offerings, enhancing satisfaction.

STACK & SKILLS

Technical: React · Vite · Python · Django · Django REST Framework · FastAPI · Node.js · Express.js · PostgreSQL · MySQL · Supabase · Flutter · Material UI · RESTful APIs · API Design · JWT Auth · Figma

Deployment & DevOps: Git · GitHub · AWS · Vercel · Railway · Render · Heroku CLI · Railway CLI · PythonAnywhere · CI/CD Pipelines · Docker · Postman · Pytest

Languages: Python · JavaScript · Java · Dart · Rust

Blockchain: Rust · Anchor (Solana)

Soft Skills: Team Collaboration · Critical Thinking · Adaptability · Problem-Solving · Time Management · Client Communication · Project Management

EDUCATION

ALX Africa: Diploma in Backend Development; Certificate in Professional Foundations

Kenya Institute of Software Engineering, Thika (2021 to 2023): Diploma in Software Engineering (Enterprise Development)

Yusudi Sales Academy (2023): Certificate in Sales & Business Development
